WELD CABLE IN A UTILITY APPLICATION

CUSTOMER PROBLEM:

Utility customer was having problems with weld cable repeatedly failing due to abrasion, oil and weld splatter. The cable was frequently being run over by tow motor trucks as well.

TPC SOLUTION:

The existing weld cable was replaced with Super-Trex® welding cable. The Super-Trex® weld cable has lasted 5 times longer than the previous weld cable. The cable has provided a great reduction in the number of inspector citations as well.

CUSTOMER'S RESULT:

Due to the length of service the Super-Trex® cable has provided, the customer has seen a material savings of over \$10,000 and an estimated labor savings of over \$12,000 in a 22 month time frame. In addition, since the Super-Trex® cable has reduced the number of cable failures, the customer has seen an increase in production time of 462 total hours.

TPC PRODUCT: Super-Trex® 600 Volt Welding Cable
